

# SUPPLIERS OF COMPOSTABLE FOODWARE

Canada and the United States

## PLEASE NOTE:

- Every certified compostable product is biodegradable, but NOT every biodegradable product is certified compostable. More info [here](#).
- When purchasing foodware, please ensure to buy paper or certified compostable products to ensure they can be accepted at your local compost facility. This is especially important for compostable plastics as if your products are not certified compostable, we will be placing them in the garbage.
- These are not the only compostable foodware suppliers on the market. This document only lists some suppliers for your convenience.
- Want to confirm if your products are BPI certified compostable? Click [here](#).
